VMC COIN

VMC COIN

INTRODUCTION

Market Background:-

        The blockchain is an incorruptible digital ledger of economic transactions that can be programmed to record not just financial transactions but virtually everything of value. Financial and technology industries alike are combining wonderfully, giving rise to the birth of blockchain outside of its normal working conditions. Blockchain is a distributed digital ledger designed to power and back cryptocurrencies.

Cryptocurrencies have been the top performing asset class over the last decade with its total market capitalisation growing from around $1.7 Billion in 2013 to where it stands now at $ 1.7 Trillion. Recent months have witnessed global institutional investors – pension, hedge and endowment funds, which historically invest in diverse asset classes including stocks, commodities and real estate – invest in cryptocurrencies to diversify their investment portfolios and spread their risk.

VMC COIN

VMC COIN brings sound money to the world, fulfilling the original promise of Bitcoin as "Peer-to-Peer Electronic Cash". Merchants and users are empowered with low fees and reliable confirmations. The future shines brightly with unrestricted growth, global adoption, Permissionless innovation, and decentralised development. All are welcome to join the VMC COIN as we move forward in creating sound money accessible to the whole world.

Limitless

Sound money is an alternative to opaque monetary policy, one that bakes transparency and fairness into its design. Money without limits means no more asking banks-with their fees, delays, and fraud risk" for permission to use your resources as you choose. We believe endowing money with these characteristics is foundational for building peaceful and prosperous societies.

Easy to use

Whether it's your pay check, pension or piggybank savings, money matters to us all. The ability to freely acquire and use personal resources is a vital component of human dignity and a fundamental human right. That's why we stand for sound money without limits.

What we're doing about it

Our products make cryptocurrencies like Bitcoin, Ethereum more accessible. Individuals can buy, use, and store them securely with digital wallet and financial services. Businesses get access to the tools they need to accept cryptocurrency payments. Developers get support building technologies that promote financial inclusivity. Everyone who visits Bitcoin.com can learn about the future of money from a trusted source.

VMC COIN

WHAT IS VMC COIN ?

2629 Travis Street
West Palm Beach

info@visioncoin.io

About us

VMC COIN is built on the Binance smart chain and is one of the first crypto projects which is in collaboration with a real manufacturer, producing VMC COIN
VMC COIN is a loyalty token that allows holders to benefit from discounts, consumer benefits, project decisions, and reflection!
VMC COIN is looking to fully revolutionise the decentralised world. We have put together a team behind the VMC COIN project to build better technology than what is currently available today. We are more than just a DeFi token, we are the future of Defi / Decentralization and Cryptocurrency.

Goals

We believe that by accelerating the transition to adopting cryptocurrency, we can help people globally to:

Real VMC COIN Business

The goal of VMC COIN is to make investments for holders profitable by creating a successful real VMC COIN business.

More Ways to Earn

With the income of the VMC COIN sale and NFT collection, regular buybacks of VMC COIN tokens will take place, which will increase the price and make the investment for each holder more attractive.

Protect their identity

No central entity can compromise your identity.

VMC COIN

WHY USE VMC COIN ?

2629 Travis Street
West Palm Beach

info@visioncoin.io

Global Reach

With VMC COIN, you can send money to anyone, anywhere in the world, 24 hours a day, 365 days a year. Like the Internet itself, the network is always on. No transaction is too big or too small. And you never need anyone's permission or approval.

Control

The seizing of capital from account holders that occurred in Cyprus and nearly in Greece, demonstrated that bank deposits are only as safe as political leaders decide. Even under the best of conditions, banks can make mistakes, hold funds, freeze accounts, and otherwise prevent you from accessing your own money. Banks can also decide to block your transactions, charge you fees, or close your account without warning. VMC COIN gives you full, sovereign control over your funds, which you can access from anywhere in the world.

Fixed Supply

The VMC COIN protocol ensures there will never be more than 30,00,00,000 coins in existence. Governments constantly print money out of thin air, endlessly inflating the supply and devaluing everyone's savings VMC COIN has a fixed supply and therefore represents sound money.

Privacy

VMC COIN offers more privacy and anonymity than traditional payment systems like bank transfers and credit card payments, since it's normally impossible to know who controls a Bitcoin address. VMC COIN offers various levels of privacy depending on how it is used. It's important to educate yourself thoroughly before using " VMC COIN " for privacy purposes.

VMC COIN

VMC COIN BENEFITS

2629 Travis Street
West Palm Beach

info@visioncoin.io

Discounts

Many merchants offer discounts for paying in Bitcoin, because it eliminates credit card fees and helps grow the adoption of this new payment system.

COIN Economics

Storing and managing COIN on a blockchain provides greater transparency and integrity than traditional forms of asset accounting and trading VMC COIN supports token protocols that power a variety of projects, and it is easy to create your own token backed projects.

Support Freedom Worldwide

VMC COIN is a permissionless, open network. It empowers you to engage with your fellow human beings without intrusion. It's decentralized, voluntary, and non-aggressive. As usage grows, old power structures will erode while fresh ideas blossom. It may help usher in the greatest peaceful revolution the world has ever known.

Benefits for Users

Low Fees

The network fee for a typical VMC COIN transaction is less than one penny. If you want to convert your VMC COIN into fiat currency, such as US dollars, you can do that through merchant processors for a cost that is still much lower than credit card processing.

No Extra Costs

Unlike credit cards, there are never any automatic voids, refunds, chargebacks, or other unexpected fees. Fraud protection is built into the system with no cost to the merchant.

VMC COIN

PURPOSE OF THIS PAPER

2629 Travis Street
West Palm Beach

info@visioncoin.io

The VMC COIN is made up of a number of protocols and innovations. It's important to have clear documentation and technical specifications on key protocol design and implementations - for which we utilize an VMC COIN . However, we feel it's equally important that we help our communities to understand what we try to accomplish, the trade- offs we have made, and how we have arrived at our current design decisions. We start this document with a detailed examination of the problems that public permissionless blockchains/Coins face today and the existing solutions attempting to solve them. We hope this provides the necessary context for our readers to understand our own rationale on how best to approach these challenges, and our underlying design decisions. We then provide a high-level walkthrough of all parts of the VMC COIN, with a focus on how they work together to support the overall vision of the network. Scalability, sustainability and interoperability are among the largest challenges public permissionless blockchains/Coins face today. While many projects claim to have solutions to these problems, it's important to understand where these problems come from and put solutions in the context of possible trade-offs.

VMC COIN
VMC COIN

New Customers:-

A growing number of patrons are choosing VMC COIN as a preferred payment method. They favour merchants who offer this payment option and actively seek them out.

Free Marketing and Press:-

By accepting VMC COIN , merchants can gain free listings in website and app directories, gaining even more customers. They can also take advantage of this new trend and generate press for their business.

The History of Bitcoin

In October 2008, Satoshi Nakamoto published the famous white-paper entitled "Bitcoin: A Peer to Peer Electronic Cash System". In 2009, he released the first bitcoin software that powered the network, and it operated smoothly for several years with low fees, and fast, reliable transactions.

Unfortunately, from 2016 to 2017, Bitcoin became increasingly unreliable and expensive. This was because the community could not reach consensus on increasing the network capacity. Some of the developers did not understand and agree with Satoshi's plan. Instead, they preferred Bitcoin become a settlement layer.

By 2017, Bitcoin dominance had plummeted from 95% to as low as 40% as a direct result of the usability problems. Fortunately, a large portion of the Bitcoin community, including developers, investors, users, and businesses, still believed in the original vision of Bitcoin a low fee, peer to peer electronic cash system that could be used by all the people of the world.

VMC COIN

VMC COIN PROGRAM

2629 Travis Street
West Palm Beach

info@visioncoin.io

On October1st, 2021, we took the logical step of increasing the maximum block size, and VMC COIN was born. The network now supports up to 32MB blocks with ongoing research to allow massive future increases.

Decentralized Development :-

With multiple independent teams of developers providing software implementations, the future is secure. VMC COIN is resistant to political and social attacks on protocol development. No single group or project can control it. Multiple implementations also provides redundancy to ensure that the network retains 100% uptime.

The http://fxVMC COINcoin.com/ website is a good venue for making proposals for changes that require coordination across development teams. For those wishing to implement changes to the VMC COIN protocol, it is recommended to seek early peer-review and engage collaboratively with other developers.

About Our VMC COIN Casino:-

Enjoy an amazing library of games on a Crypto Casino brought to you by the most trustworthy brand in the industry. Our BULL Casino offer a range of video Slots, Blackjack, Roulette, Video Poker, Live Casino as well as our Exclusive games for Bitcoin gambling.

Why play at our VMC COIN casino?

Promotions & Tournaments
Participate in weekly tournaments with huge prizes! Enjoy bitcoin gambling
promotions, offering free spins, cashback, bonuses, and much more.

VMC COIN

OFFERS

Exclusive VIP Offers:-
　　　　　　　　Heavy wager? We will Enroll you in our exclusive VIP Program. Enjoy massive deposit bonuses, generous cash back, and other offers tailor-made just for you. Trusted Brand
Deposit, play and withdraw your crypto seamlessly and without a worry! Our bitcoin casino is operated by the most trusted brand in the industry. Rest assured that your gaming experience at the casino is going to be top-notch.

24/7 Support:-
　　　　　　　A highly qualified customer support team is at your service round the clock to make sure you are always at your best when you want to play.
Fast Withdrawal
Cashing out from bitcoin casino account is a breezy affair. Get your crypto within minutes of placing a withdrawal request.
Secure Crypto Casino
The assets you deposit are completely under your control, and are stored safely in your casino

VMC COIN

Cryptocurrency mining:-
is the method of verifying transactions on a digital ledger for a blockchain using machines with extensive computing power. Cryptocurrency mining is something any individual or organisation can do with adequate hardware and software resources, but the expansion of mining and increasing costs make it progressively difficult for newcomers.

This article looks at cryptocurrency mining, how it works, the best mining apps, and whether it's a profitable business model in 2022.

Cryptocurrency mining is the process where specialised computers , also known as nodes or mining rigs, validate blockchain transactions for a specific cryptocoin and, in turn, receive a mining reward for their computational effort.

VMC COIN

THE VEHICLE FOR MINING: NODES, RIGS, AND POOLS

Blockchains require an expansive network of machines to verify and store transactions to support global cryptocurrencies' overarching distributed digital ledgers. Rigs use the latest processors (e.g., GPU , FPGA , or) ASIC and do little else but serve as a node for the blockchain's network. Using standard personal computers for mining is not advisable as most lack the computational power to handle mining-level processing.

With a fleet of nodes or a pool, a group of individual miners can combine computational effort, dubbed hash rates, to win block rewards and split the earnings according to contribution.

ACHIEVING CONSENSUS THROUGH PROOF-OF-WORK

Blockchains require a protocol for achieving a decentralized consensus to verify the integrity of new blocks, and in crypto mining, this consensus mechanism is proof-of-work (PoW). By contributing computational effort to validating transactions, miners receive a predefined amount of the coin for their proof of work.

The protocol ensures the integrity of blockchain transactions and rewards miners for their expenses and effort, but it also deters threat actors hoping to manipulate the cryptocurrency. Crypto mining requires extensive processor power, creating competition and a barrier to entry for prospective nodes and mining rigs.

VMC COIN

VMC COIN CLOUD MINING

2629 Travis Street
West Palm Beach

info@visioncoin.io

Cloud mining is the process of cryptocurrency mining utilizing a remote datacenter with shared processing power. This type of cloud mining enables users to mine bitcoins or alternative cryptocurrencies without managing the hardware. The mining rigs are housed and maintained in a facility owned by mining company and the customer simply needs to register and purchase mining contracts or shares. Since cloud mining is provided as a service, there is generally some cost and this can result in lower returns for the miner.

VMC COIN

VMC COIN DECENTRALIZATION

2629 Travis Street
West Palm Beach

info@visioncoin.io

One of the largest long-term threats public blockchains/coins face is an ever-increasing barrier of independent participation and transaction verification, reflected in the cost of full node operation. Full nodes allow blockchain participants to independently verify the on- chain state/history, and hold miners or validators of the network accountable by refusing to route invalid blocks. As the cost of full nodes increases and their numbers decline, participants in the network are increasingly forced to rely on professional service operators to provide both history and current state, eroding the fundamental trust model of open and permissionless blockchains.

For a full node to keep up with the progression of the blockchain, it must have adequate computational throughput to validate transactions, bandwidth throughput to receive transactions, and storage capacity to store the entire global state. To control a full node's operating cost, the protocol has to take measures to bound the throughput or capacity growth of all three of these resources. Most blockchain protocols bound their computational or bandwidth throughput, but very few bound the growth of the global state. As these chains grow in size and length of operation, full node operation costs will irreversibly increase.

VMC COIN

VMC COIN DECENTRALIZATION

2629 Travis Street
West Palm Beach

info@visioncoin.io

Some of the critical issues facing cryptocurrency usage and VMC COIN adoption are the lack of a simplified way to send and receive money (using crypto), lending and borrowing (DeFi) and staking (the new way of mining).

Remittances

The cost of transferring funds through banks and currently known money remittance services is very high, it also takes
3 - 5 working days for the intended recipient to gets the funds, this long delay comes at a cost.
With superior and tested technology (VMC COIN technology), users will be able to send money across the world with high speed and lower cost and almost no cost using the VMC COIN platform.

Security

Security is a crucial aspect of any exchange platform, given the rising levels of hacking activities targeted at exchanges in recent times. VMC COIN is built to a high standard to ensure that the security of our users come first.
We have carried out a security assessment on our internal server, testing for external penetration and we've also consulted an external security firm to conduct a thorough external security test and full threat modeling exercise to ensure the completeness of their security controls.

VMC COIN

INTRODUCTION VMC COIN

Executive Summary

If we can email virtually anybody in the world, why can't we send them money just as easily. Or offer them a loan. These questions are the foundation of Decentralised Finance's (DeFi) beliefs activities and objectives. In short, DeFi refers to an ecosystem of financial applications that are built on top of VMC COIN . Its common goal is to develop and operate in a decentralised way – without intermediaries such as banks, payment service providers or investment funds - all types of financial services on top of a transparent and trust-less VMC COIN The DeFi field is currently experiencing an incredible surge. More than two billion US Dollars (USD) have already been deployed (»locked-in«) across a variety of DeFi applications that offer lending and borrowing services, exchange services, monetary banking services (e.g. the issuance of stable coins), tokenlization services, or other financial instruments such as derivatives and prediction markets. In that sense,

DeFi is not a specific thing, but more a loosely defined collection of ideas and projects to reshape financial services through VMC COIN technology, thereby removing the middlemen. Its disruptive potential has brought DeFi into the spotlight of the VMC COIN and communities, and increasingly also to the attention of traditional financiers and policymakers.

VMC COIN

LACK OF AUTOMATED PROCESS

The lack of automated processes on several exchanges can be frustrating for users who intend to explore value-added services. With numerous applications and the high volume of data, the room for manual human errors is also bigger. VMC COIN solves this problem by automating manual data entry tasks which in turn leads to higher productivity and no manual errors whatsoever.

Our automated process will create more transparency, drive efficiency, and facilitate process compliance.

The other challenges posed by decentralised exchanges are as follows:

In order to cope with this business context: Our vision is to develop a trust less VMC COIN for the Defi ecosystem on BSC. The project envisages the development of a truly decentralised exchange network in a trust-less environment with lightning-fast transaction speed to support Defi tokens and cross-chain communications. We have created features that encourage users to the platform that includes a fast, simple, responsive UI with transparent economic features. It is primarily to draw basic to day traders and institutional investors who prefer cost reduced convenience, speed and efficiency in execution

VMC COIN

VMC COIN DEFI

The decentralized finance (DeFi) space is extremely fragmented and difficult to navigate. Information is dispersed among unconnected products and services. DeFi users and liquidity providers often face challenges finding the right information and the right protocols for their needs.

VMC COIN is the first DeFi super app that integrates data and information from the countless unconnected services and protocols. The DeFi market has been undergoing phenomenal growth at a recent rate of 250% per annum. Those pushing this market forward deserve to tap into this ecosystem through the highest quality applications.

VMC COIN caters to that very need. VMC COIN users can access a suite of highly demanded features from one interface. Lenders, stakers, and liquidity providers can all benefit from the VMC COIN application. These players will have the ability to:

Carry out automated lending in a P2P loans marketplace
Stake with a wide range of assets including XTZ, ATOM, DOT, and ADA.
Create liquidity, lending, and staking pools.

VMC COIN

VMC COIN LIQUIDITY POOL

2629 Travis Street
West Palm Beach

info@visioncoin.io

Adequate liquidity is essential to the successful operation of DeFi services. A lack of liquidity causes significant challenges to users. Prices in decentralised trading become extremely volatile. Interest rates available for loans fluctuate sharply. Lenders may be unable to withdraw their assets.

Some DeFi protocols have addressed liquidity by allowing users to pool their liquidity. However, these liquidity pools remain distinct from lending and staking. VMC COIN will be the first to integrate liquidity pools, lending services, and staking services to maximised the liquidity accessible to the user.

Any investor will be able to deposit their idle assets into a liquidity pool and earn a reward on their allocated assets. Rewards will vary based on how the liquidity is utilised. There are several possible means by which the assets can deepen the liquidity of the integrated services:

Provide liquidity for decentralised trading. Facilitating swaps between assets.

Facilitate staking.

Prevent illiquidity events. Many lenders seeking to withdraw their assets simultaneously can oftentimes lead to insufficient assets for withdrawal. This has happened several times on the largest DeFi protocol Compound.

VMC COIN

THE EVOLUTION OF TOKENISATION

Throughout the past couple of years, we have seen how the novel idea of tokenisation has gone through many different forms from initial coin offerings, security tokens to present day DeFi tokens. The benefits and utilities from Tokenisation assets have also changed from a fundraising mechanism (ICO's), to a method of unlocking trapped value from traditional assets (Security Tokens). More recently, this has evolved to a hybrid automated fee/governance model (DeFi tokens). Here at VMC COIN we have innovated with different forms of Tokenisation through Micro Token Offerings (VMC COIN) which distributed tokens based off of various requirements whether it be active participation in the community or protocol, funding, engagement, or stake amount (an evolution to the normal airdrops from other projects). Soon we will release VMC COIN 2.0, a new iteration of the Standard Tokenisation Protocol that facilitates the issuance and trading of assets that track assets on other blockchain platforms as well as off-chain. VMC COIN 2.0 will give users access to multi-chain assets and new financial products on different blockchains without heavy over collateralization or expensive bridge fees.

VMC COIN

VMC COIN CRYPTO CURRENCY

2629 Travis Street
West Palm Beach

info@visioncoin.io

VMC COIN is a 100% community governed, decentralized cryptocurrency that launched in November 2021. Our missions are chosen by the community! They're my family and our team, they draw on expertise from all around the world and the goal is to make our family one of the most creative, innovative and largest cryptocurrency projects in the universe. We have created a DeFi protocol, which is the beginning of our DeFi ecosystem. This ecosystem will serve as a central point for a host of DeFi products and applications that will allow investors to add to their wealth generating abilities, grow their portfolios and experience DeFi in a user-friendly system. As our family grows in members and value, it is our priority to always give back to underserved communities around the world. I'm extremely proud to have my community participate in the governance of my token, all initiatives are executed through expertly drafted proposals and a secure voting process, that ensures the best decisions are formulated for the ensured growth of the token. Join one of the most vibrant crypto projects you'll ever see! A place where the project starts with you - the community.

VMC COIN

INTRODUCING VMC COIN

2629 Travis Street
West Palm Beach

info@visioncoin.io

VMC COIN is a digital currency, a one-stop ecosystem based on the BSC's technology and smart contracts. VMC COIN promises its token holders and crypto/fiat users a diversified digital and global financial service network. VMC COIN is bridging the stability of real assets with the fluidity, balance, and technological accessibility of a decentralised digital currency revolution. VMC COIN multi-level platforms / multi-level financial ecosystem are built on BSC technology housing an industry- leading arrays of functionalities utilising micro-service architecture to ensure limitless scalability. VMC COIN is a BSC-20 utility token created to work in an ecosystem of business applications to have global circulation and addressing holder's basic daily real life transaction needs and accessing various DeFi activities.

With the most advanced VMC COIN technology, VMC COIN aims to build a more inclusive financial system where more people, SMEs and corporates have access to better financial services. VMC COIN platform is the product of aspiring and innovative minds both in VMC COIN and financial platforms.

The company's main aim is to develop a robust and technologically advanced solution that is beneficial for all the people using the platform.

VMC COIN

MORE ABOUT VMC COIN

2629 Travis Street
West Palm Beach

info@visioncoin.io

Vision

VMC COIN envisions to be the one-stop destination for services and transactions of financial industries that integrates VMC COIN technology using cryptocurrency with the finance industry.

VMC COIN is established as a topmost DeFi platform by using VMC COIN for various DeFi activities for everyone's needs making all transactions easy, convenient, private and secured.

Mission

VMC COIN strive towards the development of a more stable and robust DeFi platform that can replace traditional financial platforms or interoperate with them in a more modern and efficient manner. VMC COIN wishes to turn around 7 billion global population (Only 10 million people adopted cryptocurrency) who still lacks to adopt VMC COIN technology by developing interoperable applications between VMC COIN and traditional applications that will promote the wider acceptance and usage of VMC COIN over the scale.

Taking the financial industry to a decentralised platform is the main objective of our company. So that the users can make more and more money through the platform.

VMC COIN

CORE VALUES

Commitment

We want every user to participate with VMC COIN , by way of utilising and integrating VMC COIN with the various financial services. It is our commitment to being clear, consistently remains committed to the project to develop relationships that make a positive difference in our customer's lives.

Integrity

To be a transparent hub for users to interact and work together. We aim to make the DeFi market better as a whole, incorporating high standards of honesty and strong moral principles, doing the right thing all the time with no exemption.

Inspire

The community of VMC COIN holders helps create the value and relevance of the token. The business we are building on VMC COIN and cryptocurrency provides a huge opportunity for growth and expansion for the various industries supporting entertainment. This is the way, VMC COIN revolutionise and evolve with the ever-changing demands of the consumers' world.

VMC COIN

OBJECTIVES

Disintermediation

We aim to reduce the need for trusted intermediaries while increasing security, removing time and cost bottlenecks.

Connecting Businesses

By integrating a single API that makes money move faster, cheaper-and more reliable for you and your customers.

Global Reach

Our goal is to become the standard for seamless digital transactions and accessing financial services on a global scale and across borders.

VMC COIN

KEY BENEFITS OF VMC COIN

2629 Travis Street
West Palm Beach

info@visioncoin.io

VMC COIN platform is a unique, decentralised, robust, and secure platform for DeFi applications. It aims to provide a completely secured DeFi services that brings revolutionary in the financial ecosystem. Specifically, VMC COIN will:
A Multi-level financial ecosystem
A reliable and secured payment method Establish a new token-based economy
Transactions low fees, high speeds and easy access. Access to your money anytime, anywhere and get rewarded Asset's tokenisation (gaming, real estate, education, etc.)

VMC COIN continues to be a strong platform through its more amazing benefits:
Decentralised Smart contract that works on self- execution of technical functionalities with no admin interference.
Verified marketing strategy through VMC COIN which is immutable and can't be changed or altered.
Complex systems and procedures made easy to on-ramp both entry-level and advanced users.

VMC COIN

MARKET ANALYSIS

2629 Travis Street
West Palm Beach

info@visioncoin.io

With the enormous development of the VMC COIN technology, new opportunities are arising in the field of investing. Crypto markets are borderless, open 24/7, and OFFER huge potential for growth. A rapidly growing number of initial coin offerings (ICO) has led to more than 2,000 new cryptocurrencies being created and traded on daily basis, leading to high returns for many investors. In order to fully released market potential, here is the market capitalisation of the top technology based companies listed on the Nasdaq and NYSE, compared to the market capitalisation of cryptocurrencies: with no exemption.

Decentralized Finance (DeFi):
An Emerging Giant
In 2020, the growth of DeFi took the crypto world by storm. In fact, Total Value Locked (TVL) – a measure of DeFi transaction value – grew by 14x in 2020. And already in 2021, TVL has more than doubled to a total value of $37.67 billion.

VMC COIN

VMC COIN is the official currency of VMC COIN NETWORKS. It serves as an integral part of all the transactions and processes within the VMC COIN ecosystem. The ecosystem is expected to grow relentlessly due to DeFi developments on the VMC COIN network. It will be utilised in an open-source network generated through decentralised smart contracts on the BSC. VMC COIN is world's top dAPP that is build on exceptional VMC COIN DeFi experience. VMC COIN is an exclusive token for various protocols in BSC ecosystem that can be earned through trading and participating in campaigns.

Cross-chain Platform

Burn the amount initially issued to receive the locked collateral amount.

Anyone can create their own basket of assets by locking up collateral in the form of stable coin.

Assets will be integrated with existing DeFi protocols across multiple platforms.

A huge Pool of staking and membership club system with different rates of interest.

VMC COIN

VMC COIN TECHNOLOGY

2629 Travis Street
West Palm Beach

info@visioncoin.io

VMC COIN uses tested technologies integrated in a concise and easy-to-use platform. Content Distribution Tech - Content distribution software disseminates content to online audiences across a variety of communication channels, such as social networks, paid search, websites, blogs, email, and more. These tools are used by content marketing teams to expand their audience reach and increase content visibility.

This technology is being used by major companies and has already successfully delivered hundreds of millions of applications downloads.

Some Key Features:-

Automatic application updates Automatic error recovery Last-mile acceleration Redundant delivery network Multi-platform
Download permission management

Ad Tech - Ad tech is an umbrella term that describes systems of analysing and managing tools for programmatic advertising campaigns. It has plenty of moving parts, which means there are countless opportunities for agencies to set themselves apart.

VMC COIN

The basic objectives of Ad Tech operation look like this: User activity and behaviour on site is being monitored
Enable content publishers to promote their products more efficiently
Adapts to incoming information and collects the cream of the crop.
Allow users to effortlessly earn VMC COIN coins by opting into the VMC COIN Ads revenue share program

VMC COIN PROTOCOL

VMC COIN Protocol is based on the Binance Smart Chain the next generation VMC COIN DEFI developed by BSC to develop an ecosystem of decentralised applications, NFTs and digital assets. This dual-chain architecture will empower its users to build their decentralised apps and digital assets on one VMC COIN and take advantage of the fast trading to exchange on the other.

VMC COIN are long-term deflationary. Emissions have a hard-cap and are continuing to decrease, while burn is permanent and continuing to increase, and we burn quite a bit of tokens; A significant portion of protocol fees go towards token burn: 80% of all liquidation fees and 10% of all protocol lending interest earned by lenders. So as VMC COIN continues growing, more VMC COIN will be burnt, leading to the value of each remaining VMC COIN rising continuously and permanently.

GOVERNANCE

We will soon launch a governance vault that will allow community members to stake their VMC COIN ; stakers will receive x VMC COIN where 1 VMC COIN = 1 vote, allowing them to decide on key governance decisions.

VMC COIN
